

Sanderson Lincoln Pavilion

Technical Specifications

Overview

The Sanderson Lincoln Pavilion is an outdoor theater-style venue, last renovated in 2014. The Pavilion contains a permanent stage light and sound system, overhead shade sails and misters.

Stage (Platform) – *all Measurements are approximate*

30' wide

26' Deep in Center

17' Deep Stage Right

20' Deep Stage Left

Surface is Stained Concrete.

There is a 2' wide planter running the entire 30' width in front of the stage. Edge of Planter to rear of audience space is 55'.

A small indoor room Stage Right is used as a Green Room, with private bathroom facilities and industrial sink/kitchen area.

Power for stage is located upstage (both sides) as well as downstage.

Seating

Portable seating is available for rent, approximately 300 seats. The Carefree Desert Gardens and Pavilion areas are handicap-accessible.

Load In

There is a ramp from Ho Hum Dr. behind the stage that is stage-level, at Stage Right rear.

Sound

Main house speakers are permanent overhead-hung Meyer full-range amplified cabinets, positioned to cover entire audience seating area.

There are three Mixer configurations:

1) Permanent Rack in Green Room

- Presonus 16-0-2 Mixer
- 2 Mic/line inputs from Stage (Input 9-10)
- Three (3) Shure SM58 wireless mics fed to channels 1-2-3
- Capability for background music (permanent)
- CD Player with USB Port

2) Portable Stage Rack

- One (1) Shure 2 Mic input (with tone control) Mixer
- One (1) Shure Wireless SM58 Mic System
- One (1) Front Panel Mic input
- CD Player with USB Port
- Input for I-Pod

3) Front of House Mix Position (55' from stage)

- One (1) 32 Input Presonus 32-4-2 Mixer (in Portable Desk)
- Note: There is a 24x4 Mic Snake running from Stage to mix Location**

Additional Audio Accessories

- Five (5) full height mic stands
- Two (2) Mackie TH12 monitor speakers
- Four (4) Countryman Type 85 direct boxes
- Fifteen (15) XLR mic cables
- One (1) Shure wireless lavalier mic with Countryman E6 head mic
- Four (4) Shure SM58 with switch

Stage Lighting

Lighting is permanently hung on Unistrut over stage, controlled by DMX 512 from one of 2 locations:

- 1) In permanent Rack in Side Stage Room
- 2) House Mix Location

Console is 16x2 NSI 2 Scene with Master & Black Out

Fixtures are DMX-controlled weatherproof RGB LED's, hung 8 in front and 2 per side for side lighting

Note: Due to hang locations, it is suggested to have performers perform 5' upstage in order to be properly lit.

House Lighting

LED units cover entire seating area, controlled wirelessly on separate X10 unit.

Note: There is a permanent "Sanderson Lincoln Pavilion" lit logo on back of stage.
